"We have had cellular services with Cellcom for quite a few years and have always experienced excellent customer service. In August, we imported 48 [more] lines to Cellcom. Our level of service since then has gone above

and beyond my expectations. [Our customer service representatives] saved us more than \$10,000 a year. I am confident this partnership will continue to grow as our company's cellular needs do."

– Sue Herms, office coordinator, Yale Materials Handling, is saving \$1,017 per month across the company's three locations

"We're very dependent on technology, especially cellular services. We need to have connectivity at all our satellite locations in Northeast Wisconsin and the Upper Peninsula. Our [Cellcom's] representative was able to find equipment and software compatible with our preferences and standards. We've been able to save money by eliminating pagers for most roles in the clinic with texting capabilities, roughly \$25 per month for a pager."

"I have been pleased with the Cooperative and what has been accomplished since its inception. Their emphasis on wellness is an important factor in what has the potential to truly
